Wir setzen uns für Nachhaltigkeit und Umweltbewusstsein ein:

We actively work towards environmental protection and sustainability:

Mit der Unterzeichnung des BSCI Verhaltenskodex verpflichten wir uns, die sozialen Kriterien, die diesem Verhaltenskodex zu Grunde liegen, anzuerkennen und geeignete Maßnahmen zur Umsetzung und Einhaltung im Rahmen unserer Unternehmenspolitik durchzuführen.

Allgemeine Pflegehinweise

Feinwaschmittel ohne optische Aufheller, sogenannte Colorwaschmittel, verhindern Farbabfärbungen und das Ausbleichen der Wäsche. Dunkle Farben separat waschen.

Durch Verwendung von Weichspüler wird die Saugfähigkeit der Ware stark beeinträchtigt.

Wäsche vor dem Waschen aufschütteln und nicht gefaltet in die Maschine geben. Bitte nicht längere Zeit in der Waschmaschine oder im Trockner liegen lassen.

Die in den Waschsymbolen vorgegebenen Gradzahlen sind zu beachten. Unter- sowie Überschreitungen beeinträchtigen das Waschergebnis.

Unsere Polypro- und PVC-Sets (nicht Naturfaser) können per Handwäsche mit einem milden Geschirrspülmittel im handwarmen Wasserbad gereinigt werden. Bei hartnäckigen Verunreinigungen längere Zeit im Spülbad liegen lassen, ggf. mit geeigneter Bürste nachhelfen.

With signing the BSCI conductcode, we obligate to appreciate the social criteria about this code and find suitable conditions to realize and observe this as a part of our corporate policy.

general care instructions

Mild detergent without optical lightener, so-called color-washingpowder, will prevent colorbleeding and whitening. Please wash dark colors separately.

In case of using fabric softener the absorbency of the goods will strongly be affected.

Please fluff up laundry before washing, do not insert it folded. Don´t leave the laundry in the washing machine or in the dryer for a too long period of time.

Take note of the stated degrees in washing symbols. Higher or lower deviation will compromise the washing result.

Our polypro- and pvc-placemats (not natural fibre) could be cleaned per handwashing with a smooth dishwashing liquid in handwarm waterbath. In case of tough pollution, please leave it some time in the soapy water, possibly treat it with a suitable brush.
